awareproject.eu

AWARE, is an Erasmus+ (KA2) project, aiming to: develop didactic approaches, methodologies, and curriculum content to develop cybersecurity awareness and competencies, as stated as a priority for the VET sector.

Target Groups

- VET teachers.
- VET learners.
- Representatives of Small and Medium Sized enterprises (SMEs).
- Business support organisations (BSOs).
- Labour support organisations (LSOs).
- European policy experts.
- European policy makers.
- National policy experts.
- National policy makers.

Main Objectives

- To address digital transformation through digital readiness, resilience and capacity building, by developing innovative learning and teaching resources.
- To develop didactic methods, approaches, tools and content - and thus enhancing digital and cyber security skills and competences for the digital transformation, as it addresses the increased risks related to a more digitalised world in general, and more specifically, in relation to VET, digital transformation of the industry.
- To raise awareness, empower and equip participating organisations with basic knowledge in the field of cybersecurity.
- To raise awareness and educate on cybersecurity issues among VET learners and teachers related to the digital transformation of industry and organisations.
- To raise awareness and educate on cybersecurity issues among VET learners and teachers on individual level, in everyday life .

- To develop AWARE Knowledge Base, Masterclass and Self-assessment Kit to introduce VET teachers and learners with cybersecurity issues.
- To demonstrate the need and the potential for VET-business cooperation in order to enhance cybersecurity related competences of VET teachers and learners .
- To foster permeability of VET by encouraging VET learners to seek educational and career opportunities in the field of cybersecurity.
- To reach policy makers in order to strengthen the placement of cyber security in VET.

Project Results

- AWARE Knowledge Base.
- AWARE Masterclass.
- AWARE Self-assessment Kit "Cyber-Guardian".
